

PROVIDER GUIDE

HIPAA-secured transfer for Clear Billing.

Open **prism.clearbillingservices.com** on any phone, tablet, or computer. Sign in with your invited work email and login code, accept the PHI screen, then pick a path. Both stay inside Prism. Nothing goes by email, text, or shared Drive.

NEW • RECOMMENDED

Add cases

Enter each case as you finish it on your phone or computer. Fastest path. Demographics can follow later and match by MRN.

CLASSIC • STILL SUPPORTED

Upload PDF

Same bulk handwritten packet as before (charge sheets + demos), now through Prism's secure channel instead of email. Use this if you still work from paper.

Step-by-step screens

One path after sign-in. Pick **Add cases** (new) or **Upload PDF** (classic, secure channel). Screens below are stacked in order.

Step 1 • Sign in

Use your invited work email. Prism emails a single-use login code. Sessions last 8 hours.

HOW DO YOU WANT TO WORK TODAY?

Case Card

New. Type the case on your phone or computer instead of handwriting a charge sheet. Fastest path.

Packet Upload

Classic bulk PDF, now through Prism instead of email. Same paper packet, safer channel.

☒ Remember this as my default next login

Step 2 • How do you want to work today?

Add cases = new way (enter as you go).

Upload PDF = old paper packet, now through Prism instead of email.

Optional: remember your choice as the default next login.

Packet Upload: drop the same bulk handwritten packet (charge sheets + demographic sheets) here. This replaced email and other less-safe send paths. Confirmation email has no PHI.

Drop PDF here or tap to browse

PDF only · up to 80 MB

NOTE (OPTIONAL)

Optional note for our office

UPLOAD TO CLEAR BILLING SERVICES, INC.

Received. Confirmation email sent.

Step 3 · Upload PDF (classic path)

Drop the bulk handwritten packet here. You get a confirmation email with no PHI.

How a day moves

One gated channel from login to demographic match.

1 • ACCESS

Cloudflare Access allowlists the practice email. Uninvited addresses never reach the app.

2 • PHI SCREEN

Accept the PHI acknowledgment once per account. Activity is logged for ops review.

3 • CAPTURE

ADD CASES

(new) through the day, or

UPLOAD PDF

(classic packet through Prism, not email).

4 • MATCH BY MRN

Hospital demographic sheets can arrive later. Sticker MRNs sync to open cases for that DOS.

Privacy and security

HIPAA does not certify apps. What matters is a real program (BAAs, policies, workforce training) plus live technical safeguards. Prism is the practice-to-Clear Billing transfer channel inside that program, subsidized for current practices.

CONTROL	WHAT PRISM / CLEAR BILLING RUNS LIVE
Edge Zero Trust	Cloudflare Access sits in front of Prism. Sign-in uses your invited work email and a single-use login code.
Allowlisted identity	Unknown addresses are blocked. No shared office password. Offboarding removes that email from the invite list.
Time-boxed sessions	Access sessions last 8 hours , then a fresh code is required. Out clears the session.
Encrypted transport	All browser traffic is HTTPS with HSTS, through a Cloudflare Tunnel. Not port-forwarded on the public internet or left open on an office LAN.
Browser hardening	Security headers (frame deny, nosniff, referrer policy, content-security posture) reduce clickjacking and drive-by embedding risk.
Practice separation	Each practice only sees its own cases and uploads. Vault paths and API calls are scoped to the signed-in practice.
PHI hygiene	Cases and PDFs go into Prism's vault. Confirmation emails carry no PHI . Charts are not offered as downloads to personal phones or laptops.
Audit and backups	Sign-in and intake activity are logged. Hosted storage includes routine backups on Clear Billing's dedicated host path (power, uplink, and backup covered in the fee).

WHY \$49 / MONTH

\$49 / month per practice

Similar secure-transfer stacks with identity, hosting, audit, and support commonly land in the \$200-\$800+ / month range.

Covers the Prism app, secure login, PHI screen, maintenance, dedicated hosting, power, uplink, and backups.
